

LE CERVEAU

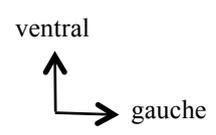

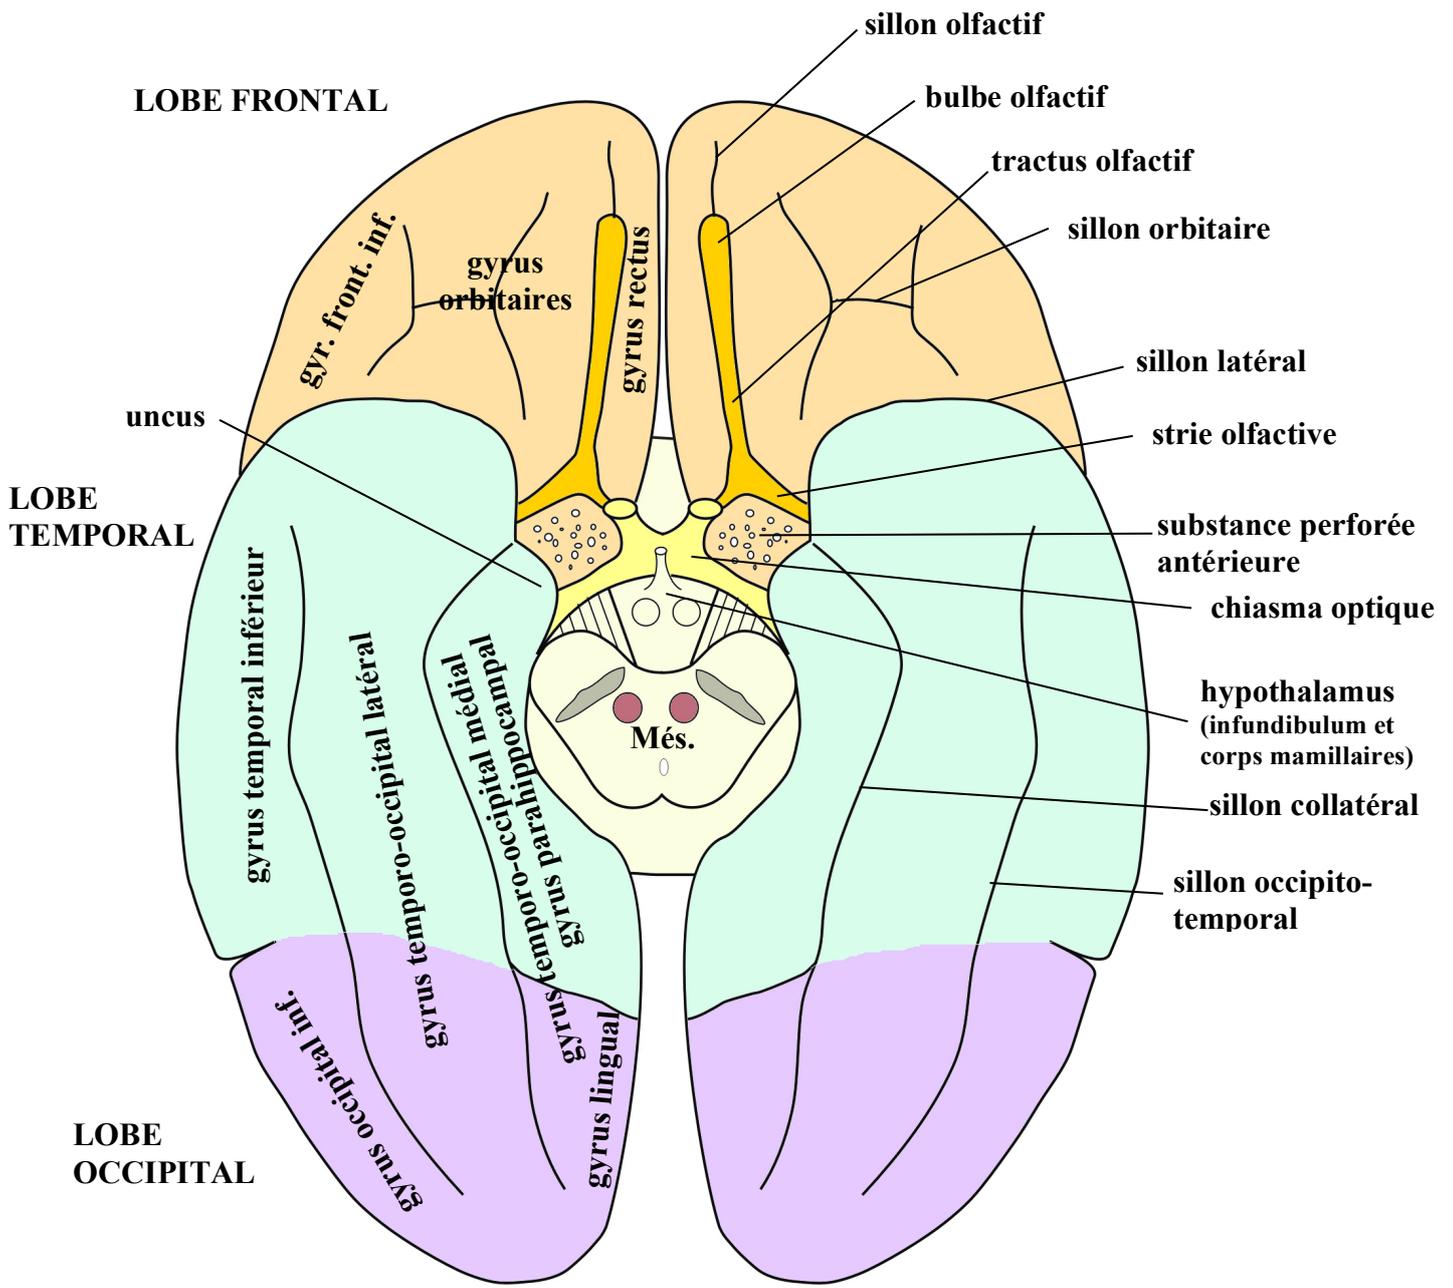

Morphologie externe générale

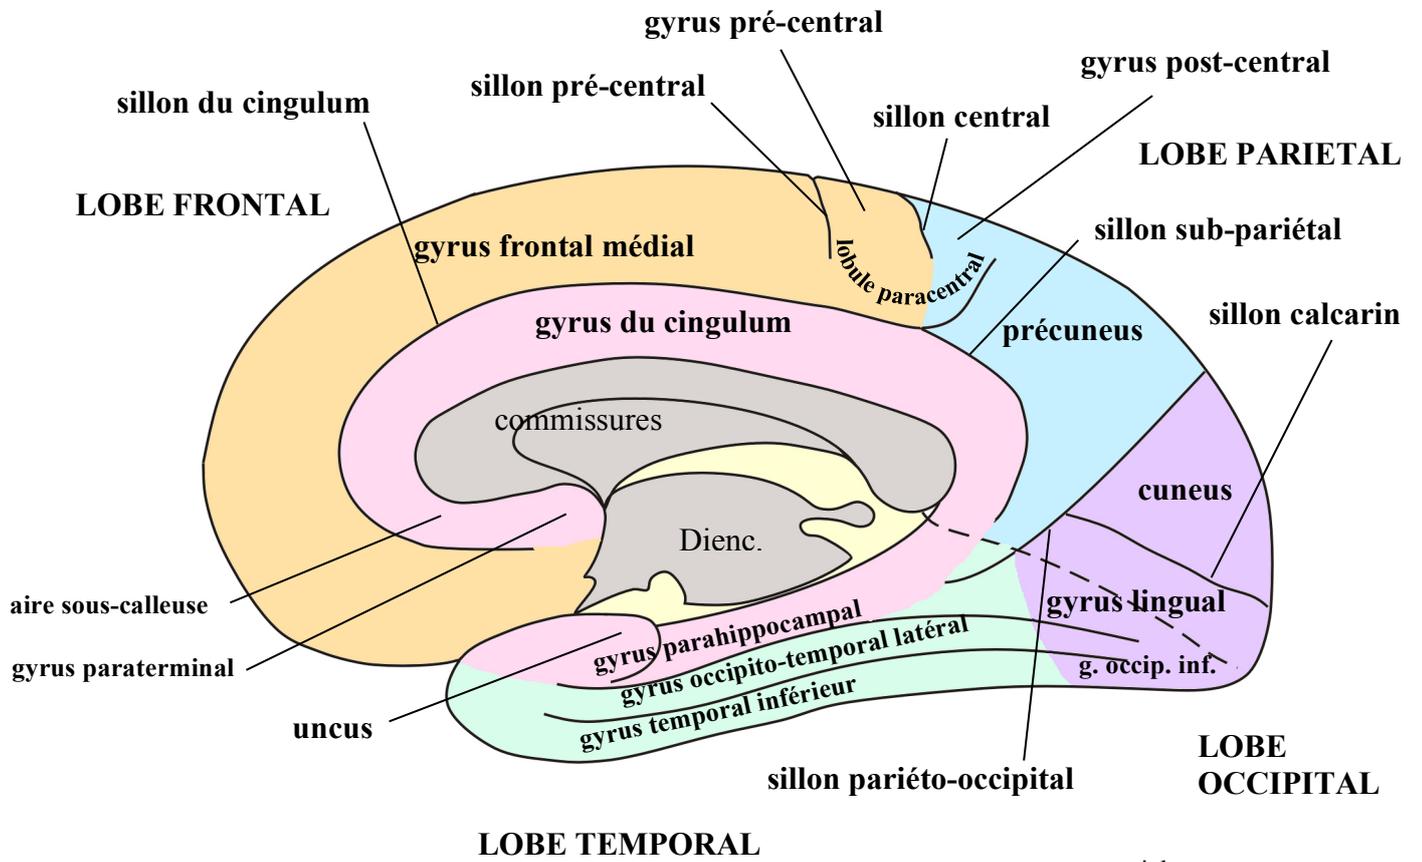

Face supéro-latérale de l'hémisphère gauche

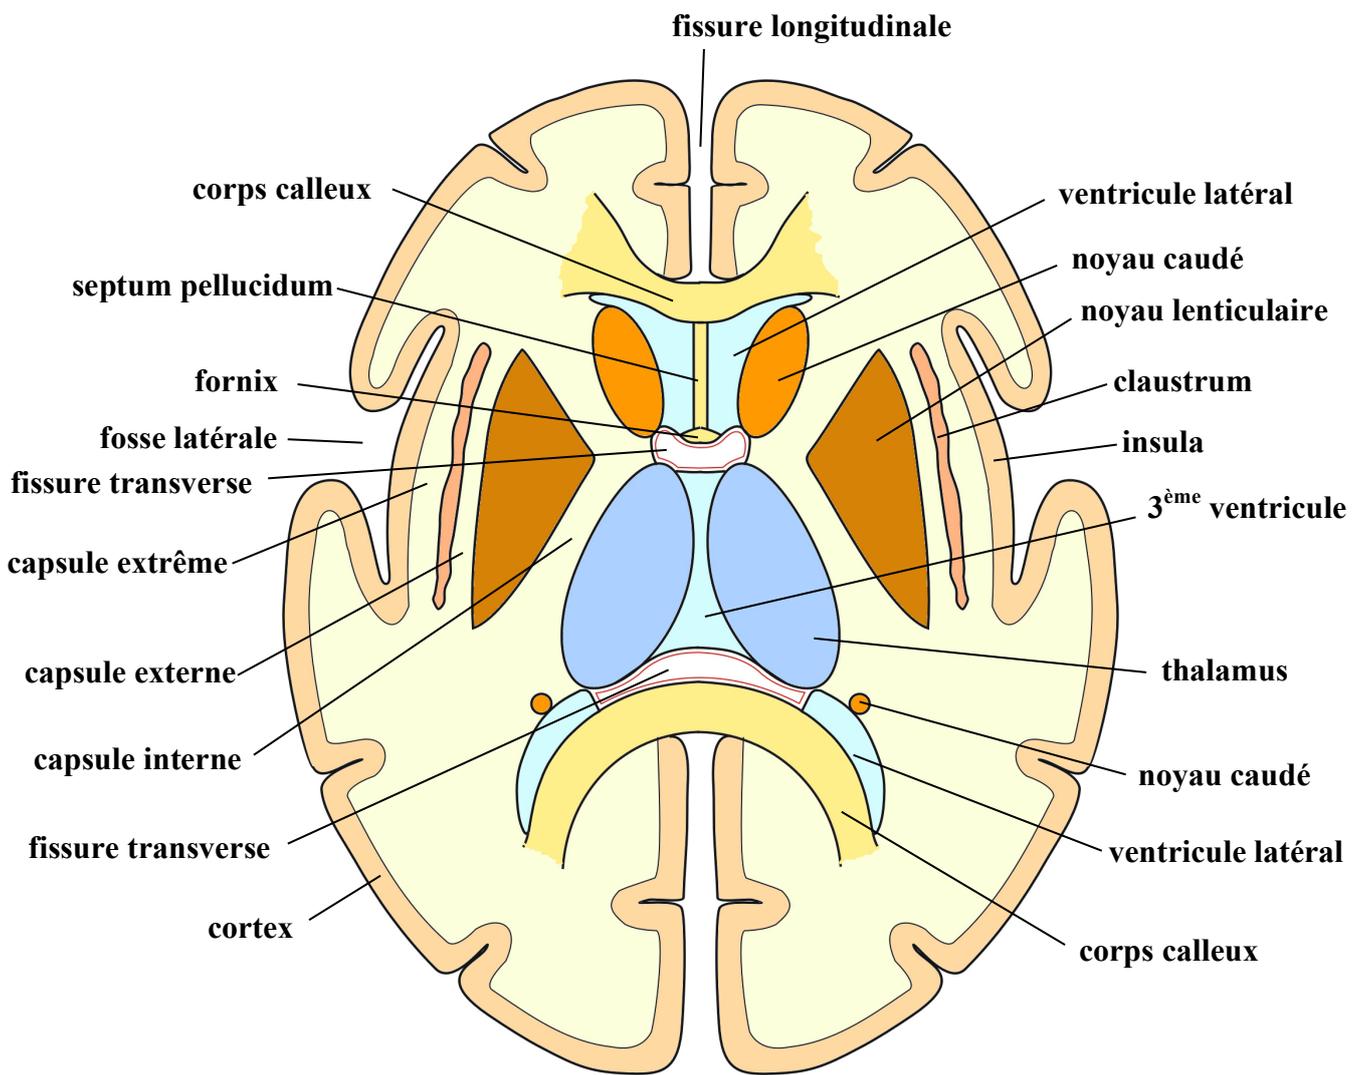

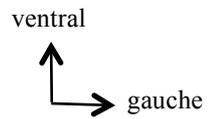

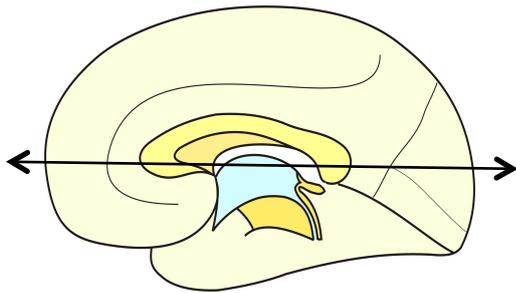

L'insula (vue latérale et coupe frontale)

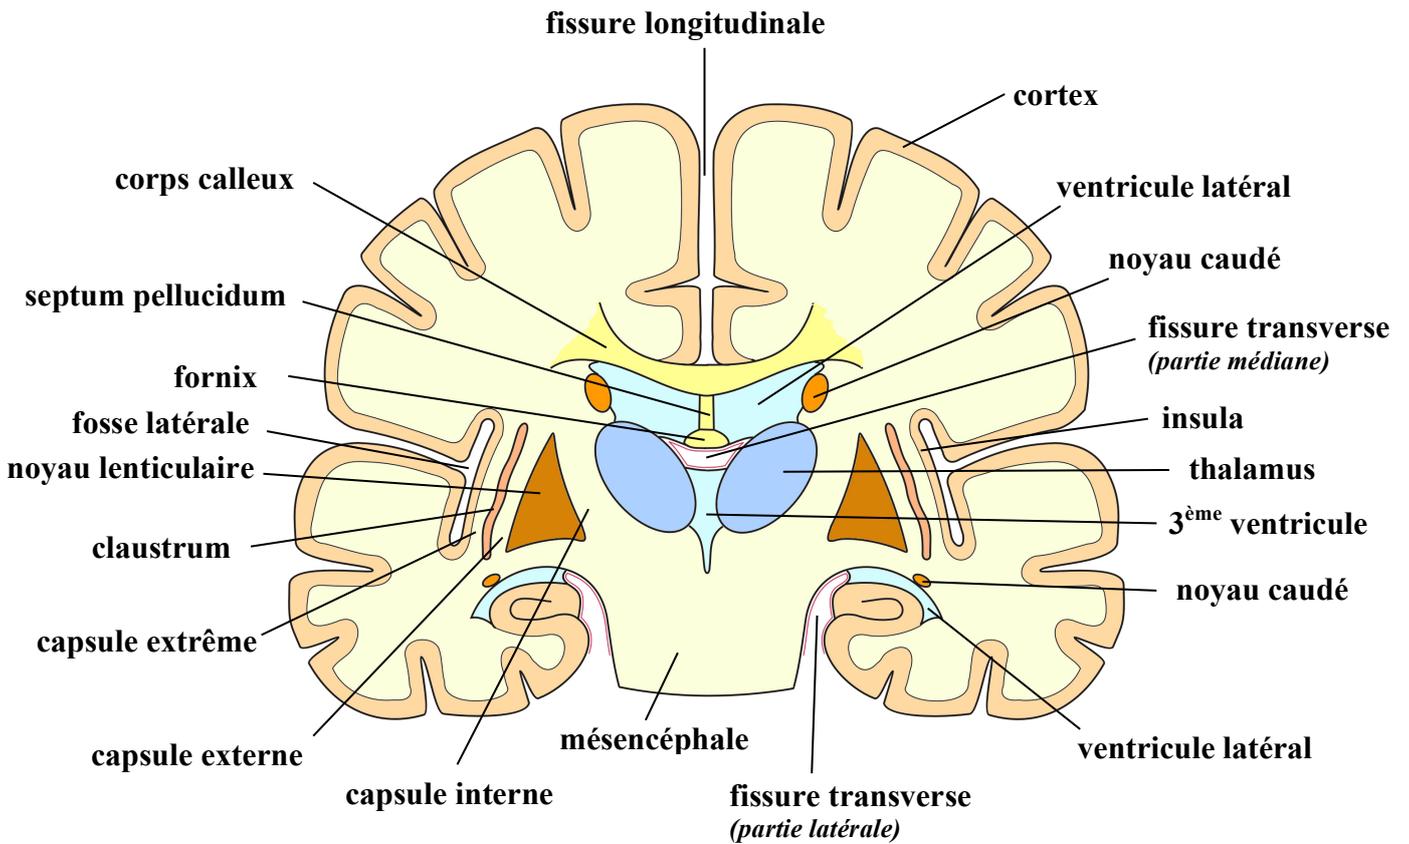

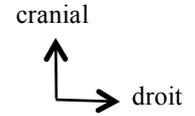

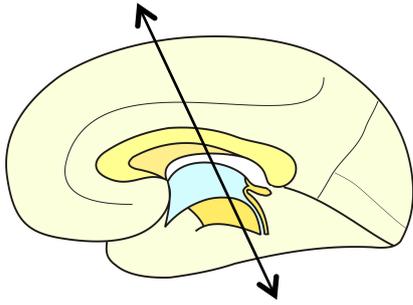

Vue inférieure du cerveau

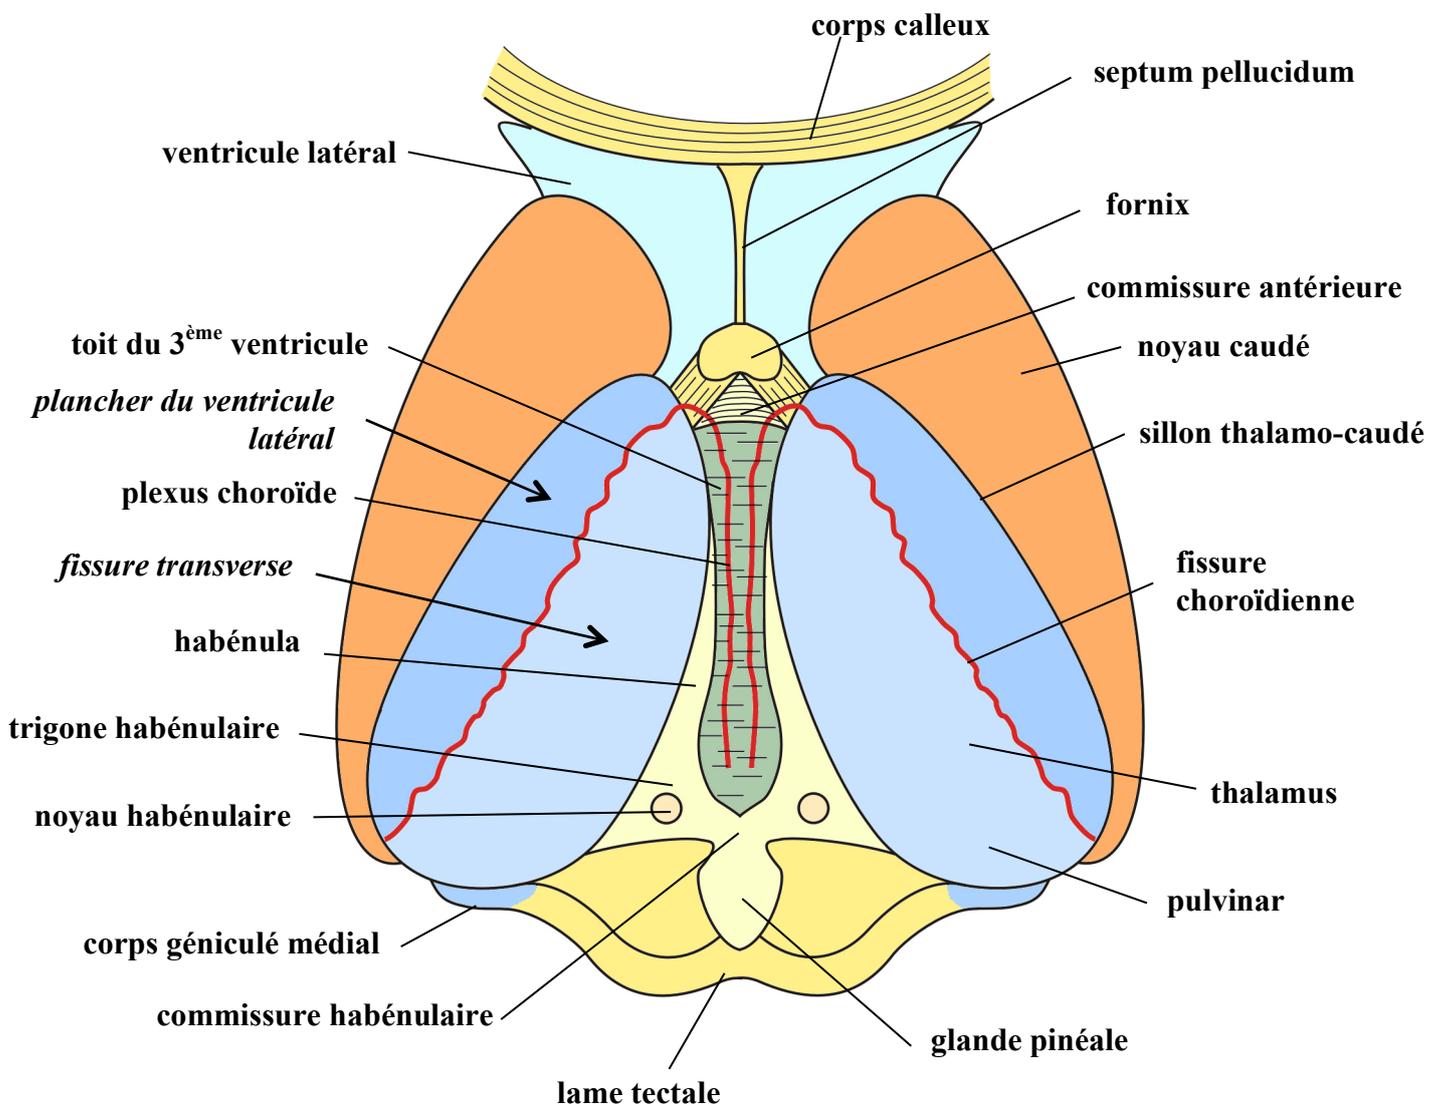

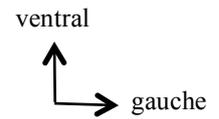

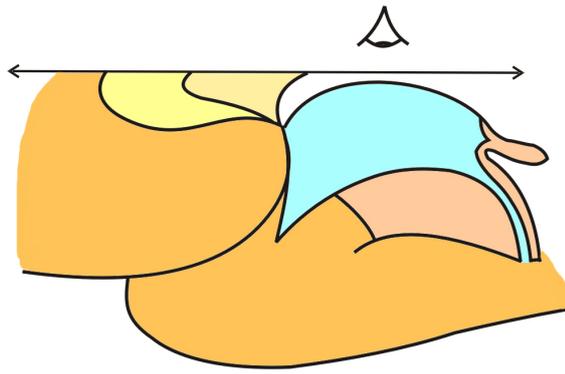

Vue des faces médiale et inférieure de l'hémisphère droit

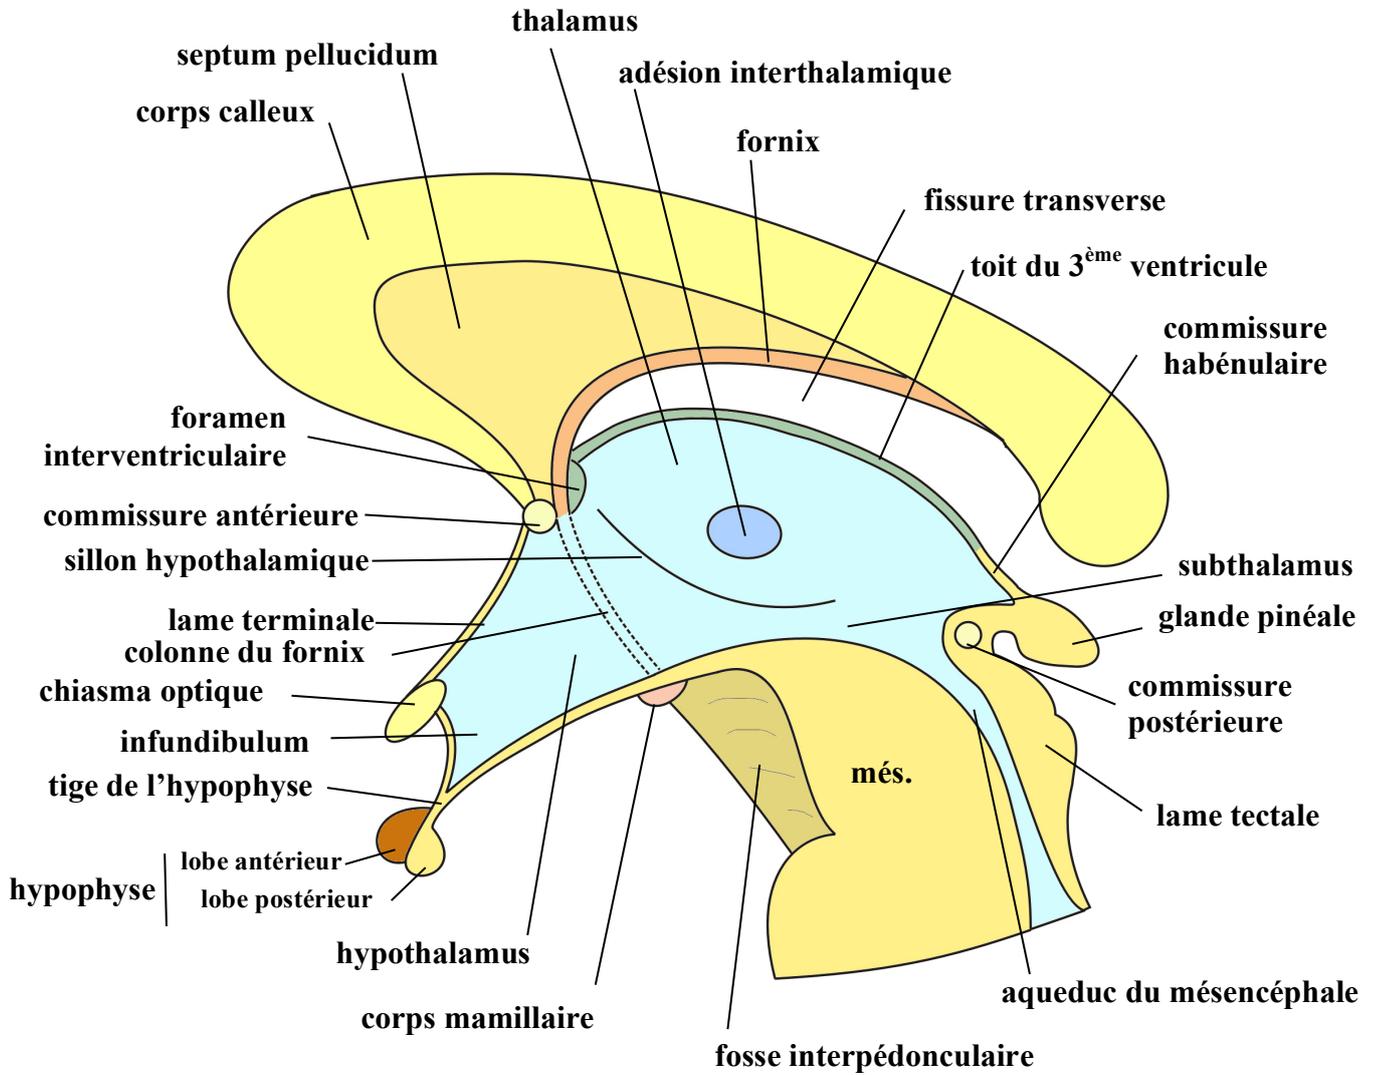

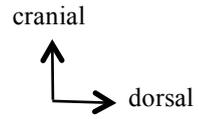

Coupe horizontale du cerveau (coupe de Flechsig)

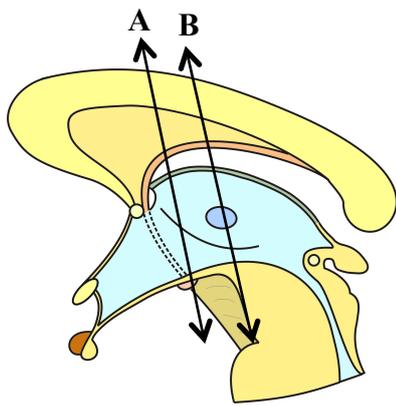

Coupe frontale du cerveau (coupe de Charcot)

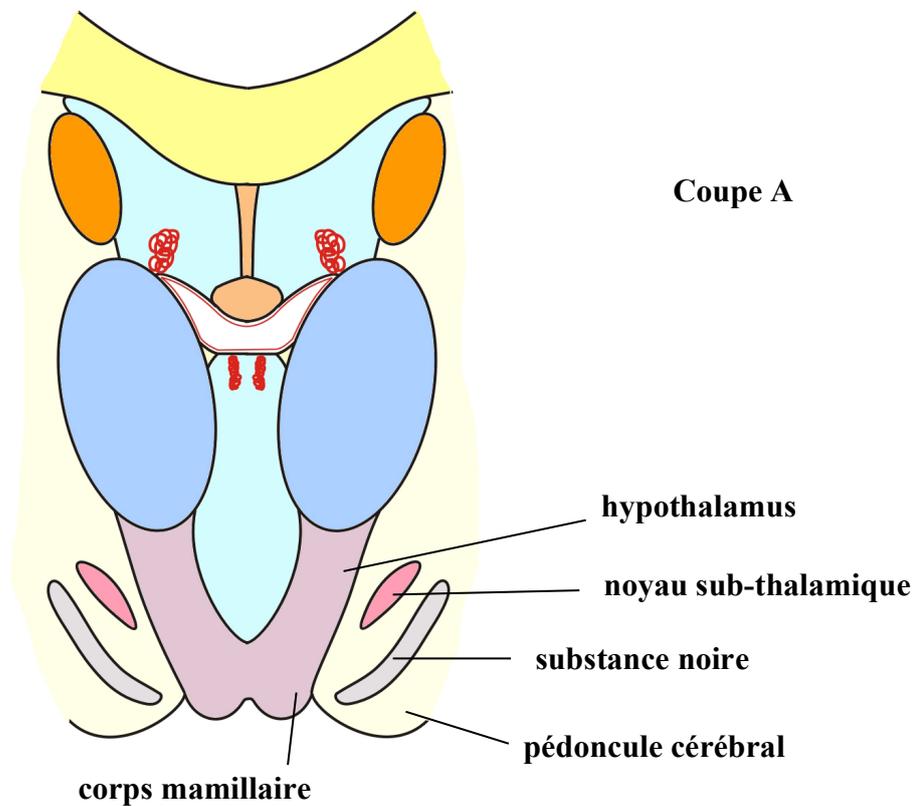

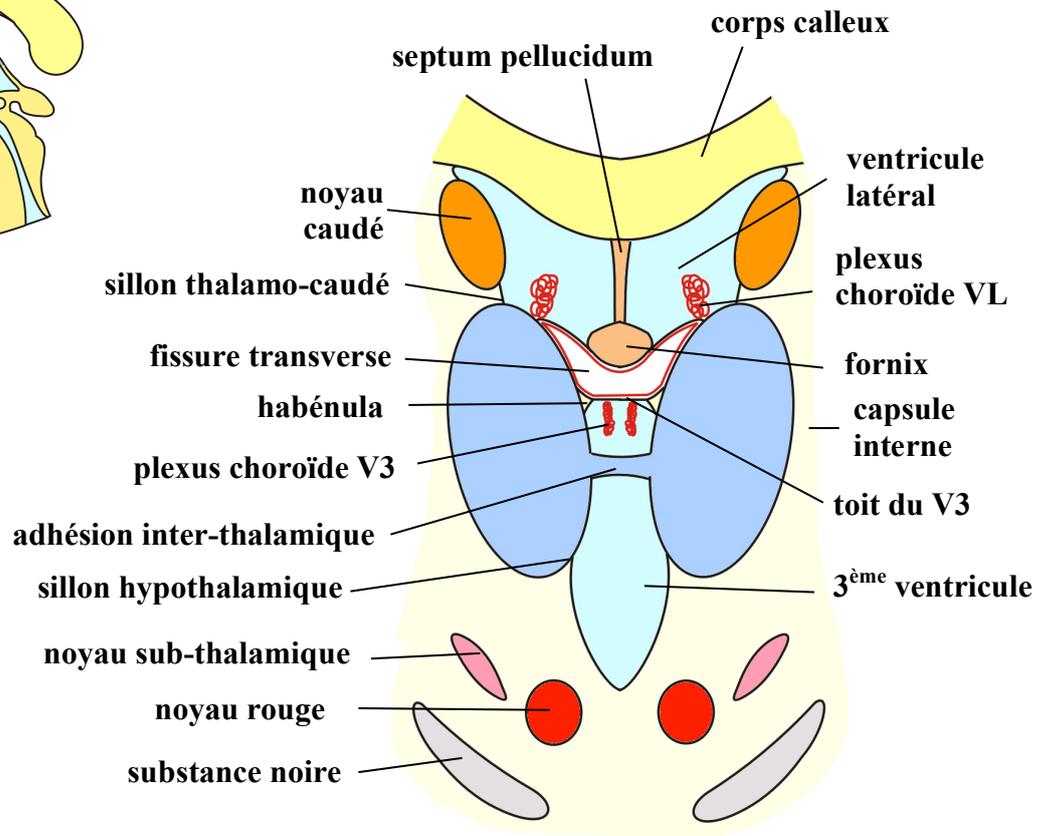

Vue supérieure du diencephale
 (après ablation des structures situées au-dessus de la fissure transverse)

Coupe sagittale médiane du diencephale

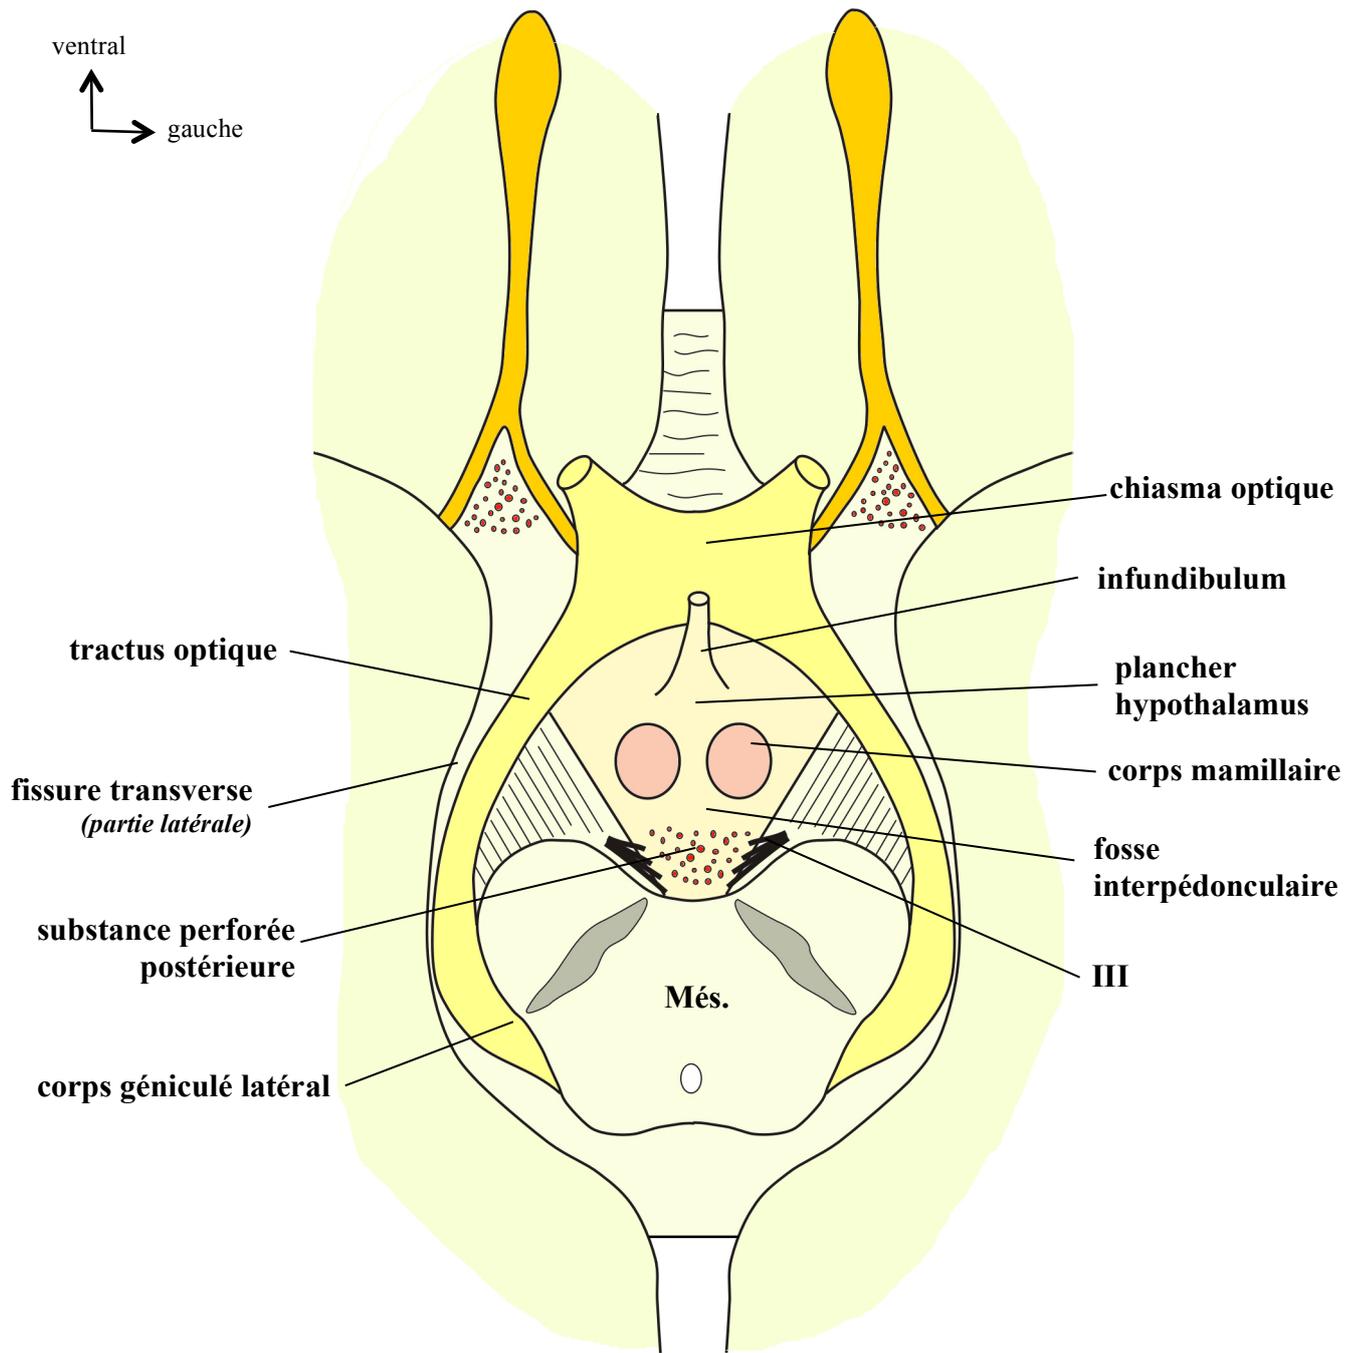

Coupe B

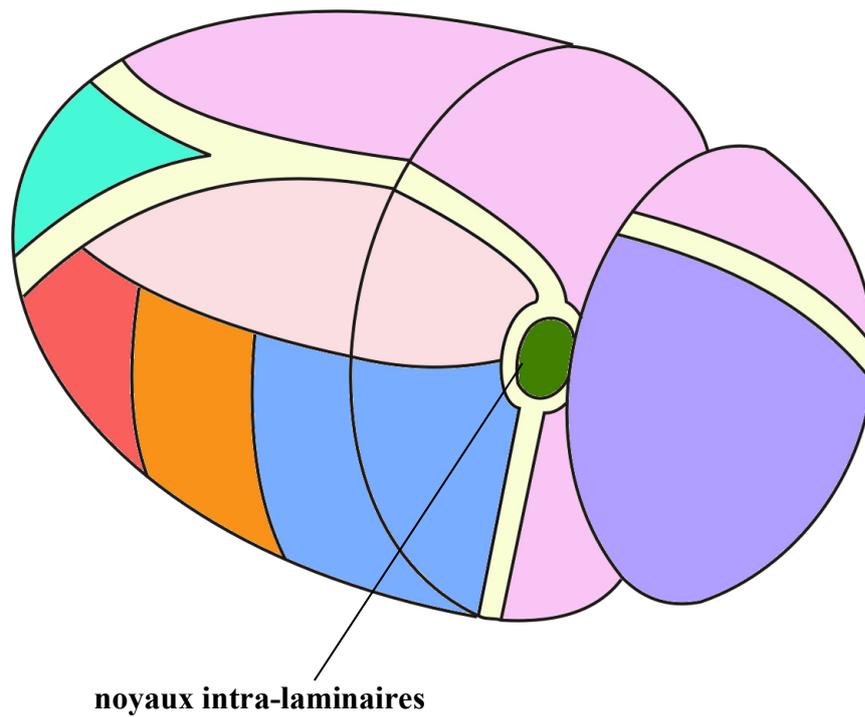

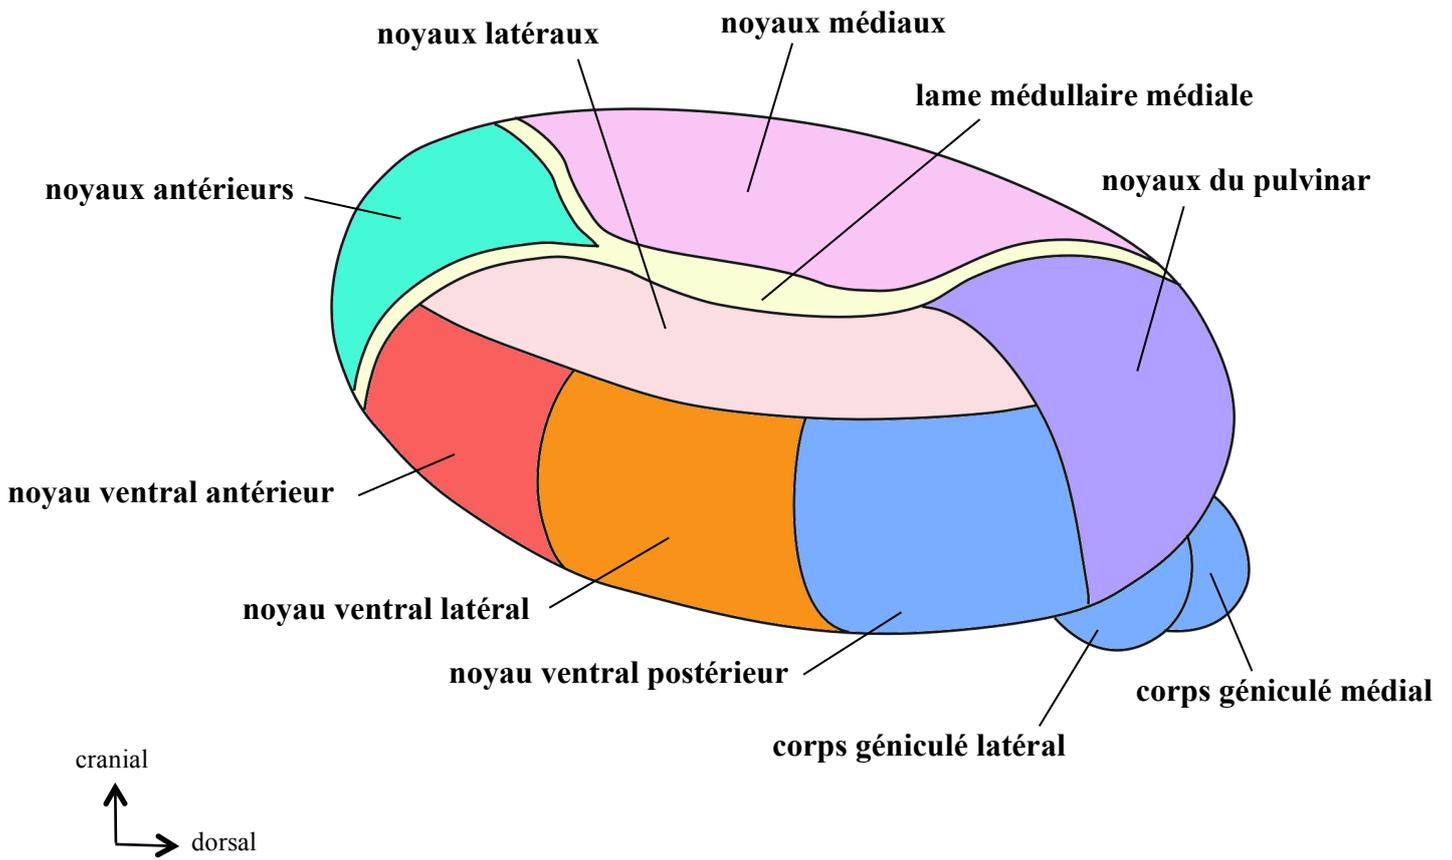

Coupe A

Coupes frontales du diencéphale

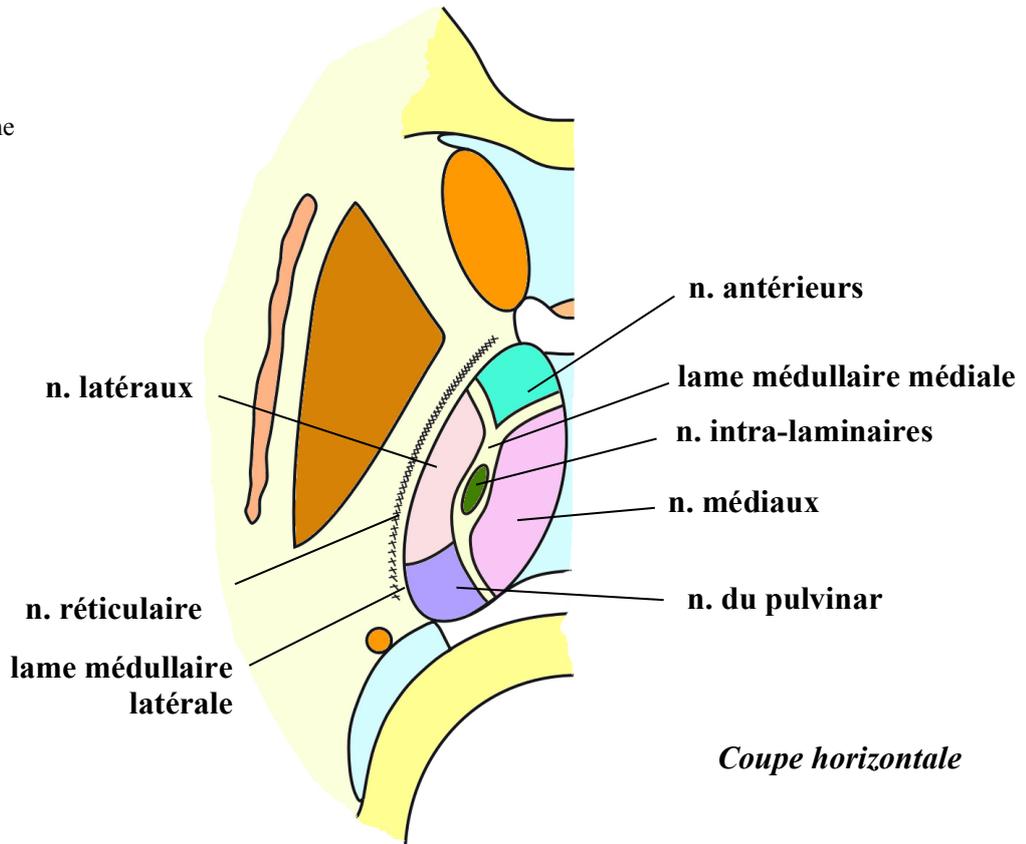

Vue inférieure du diencephale

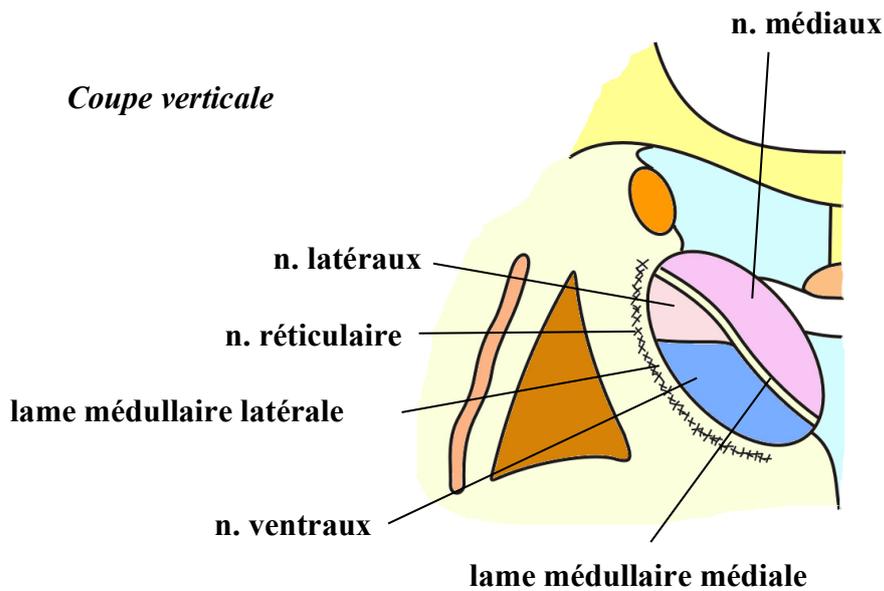

Structure du thalamus
Vues postéro-latérales du thalamus gauche

ventral

Coupe verticale

Structure du thalamus

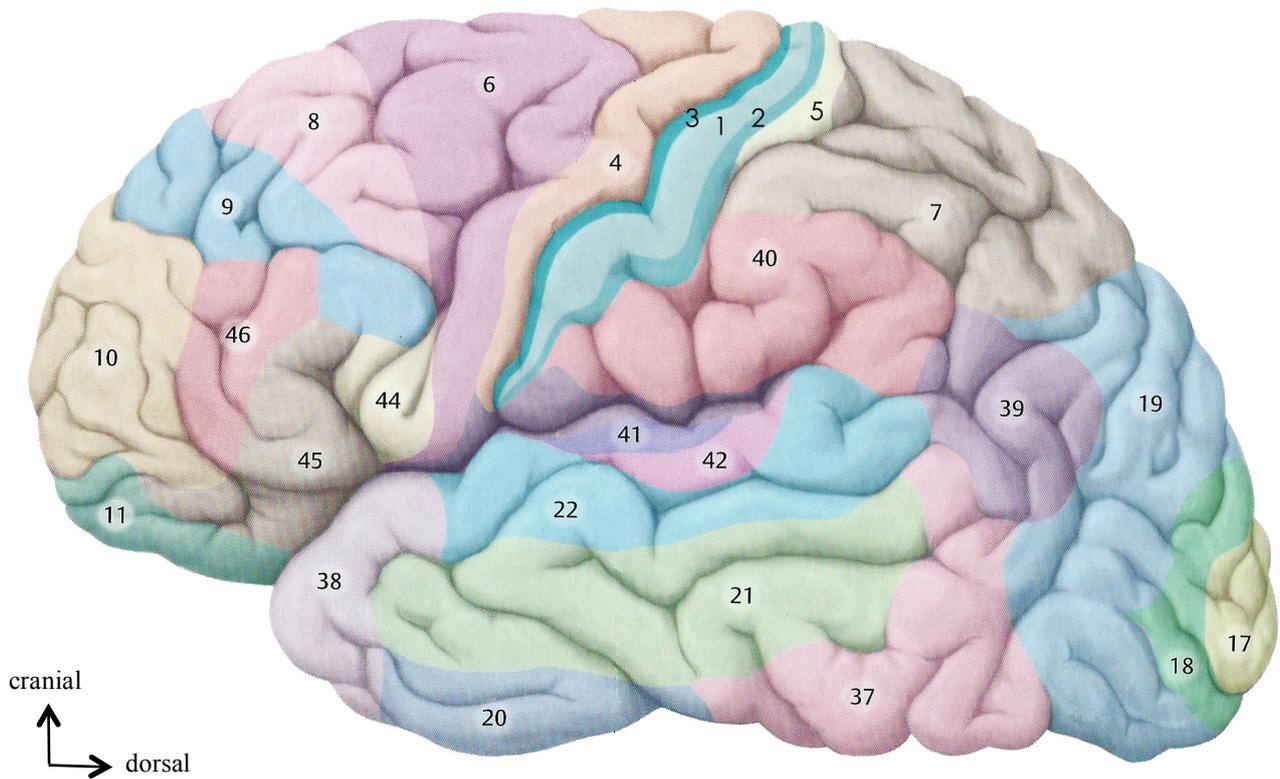

Vue latérale

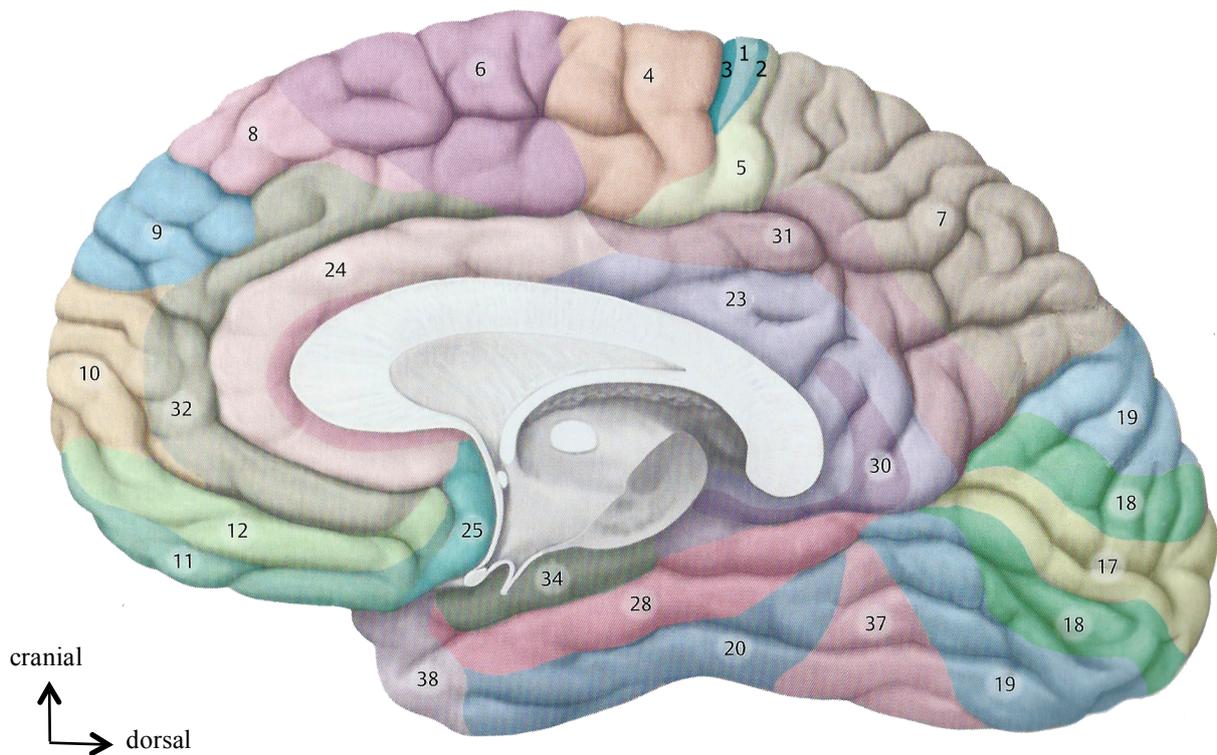

Vue supérieure

Le corps strié

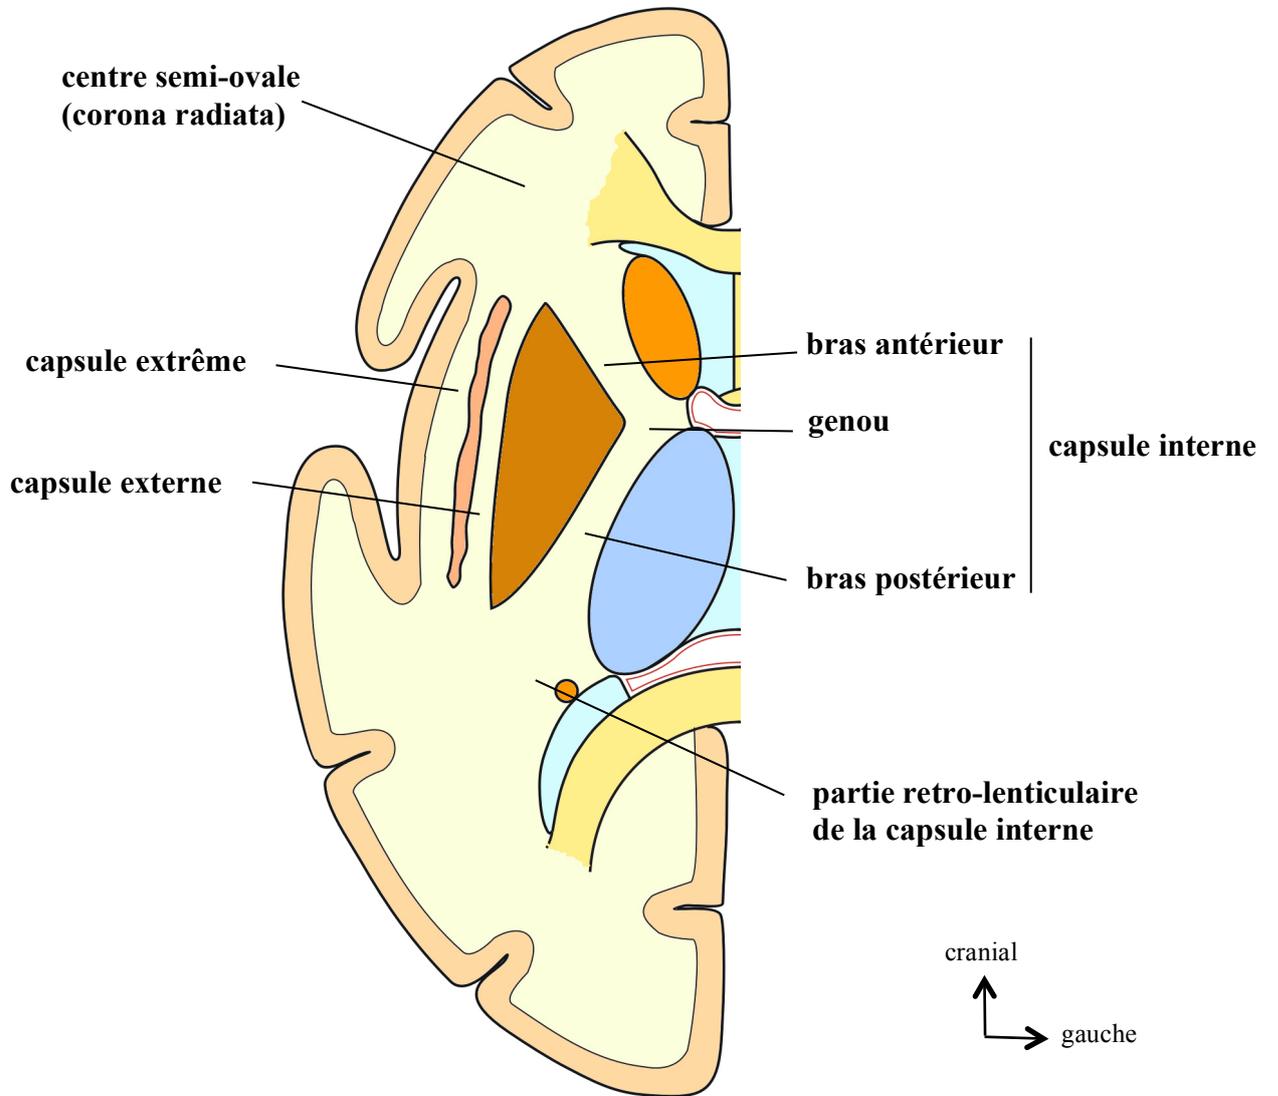

Vue latérale de l'hémisphère gauche

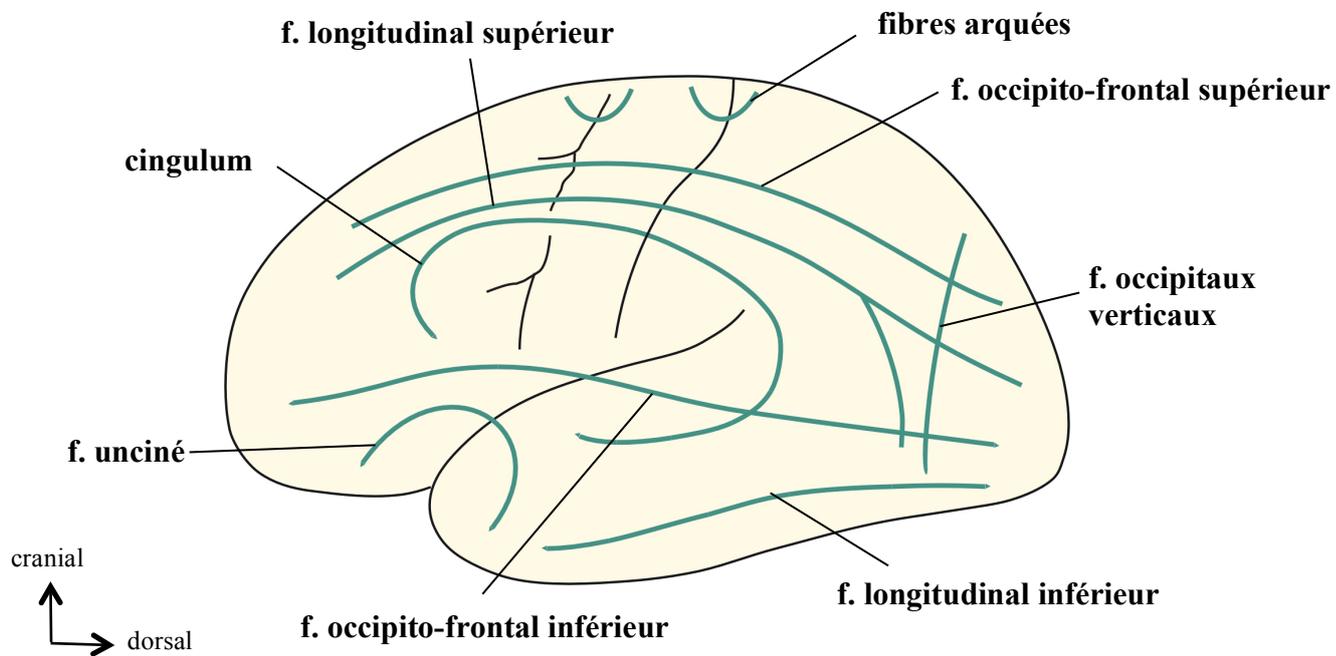

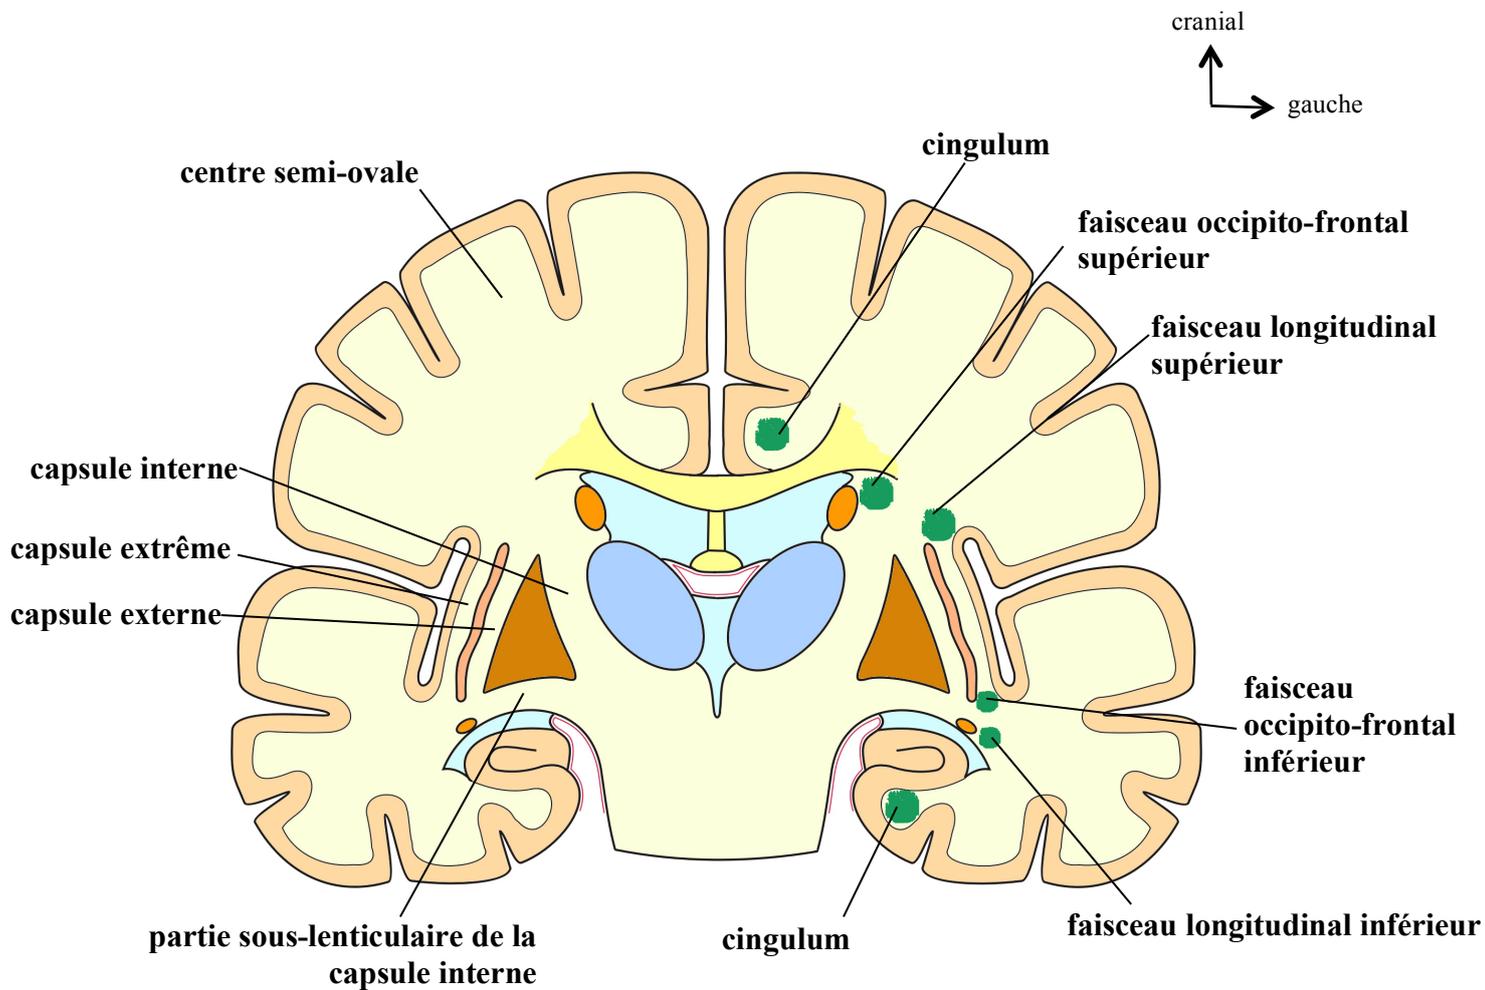

Vue médiale de l'hémisphère droit

Les aires corticales de Brodmann (d'après Schunke)

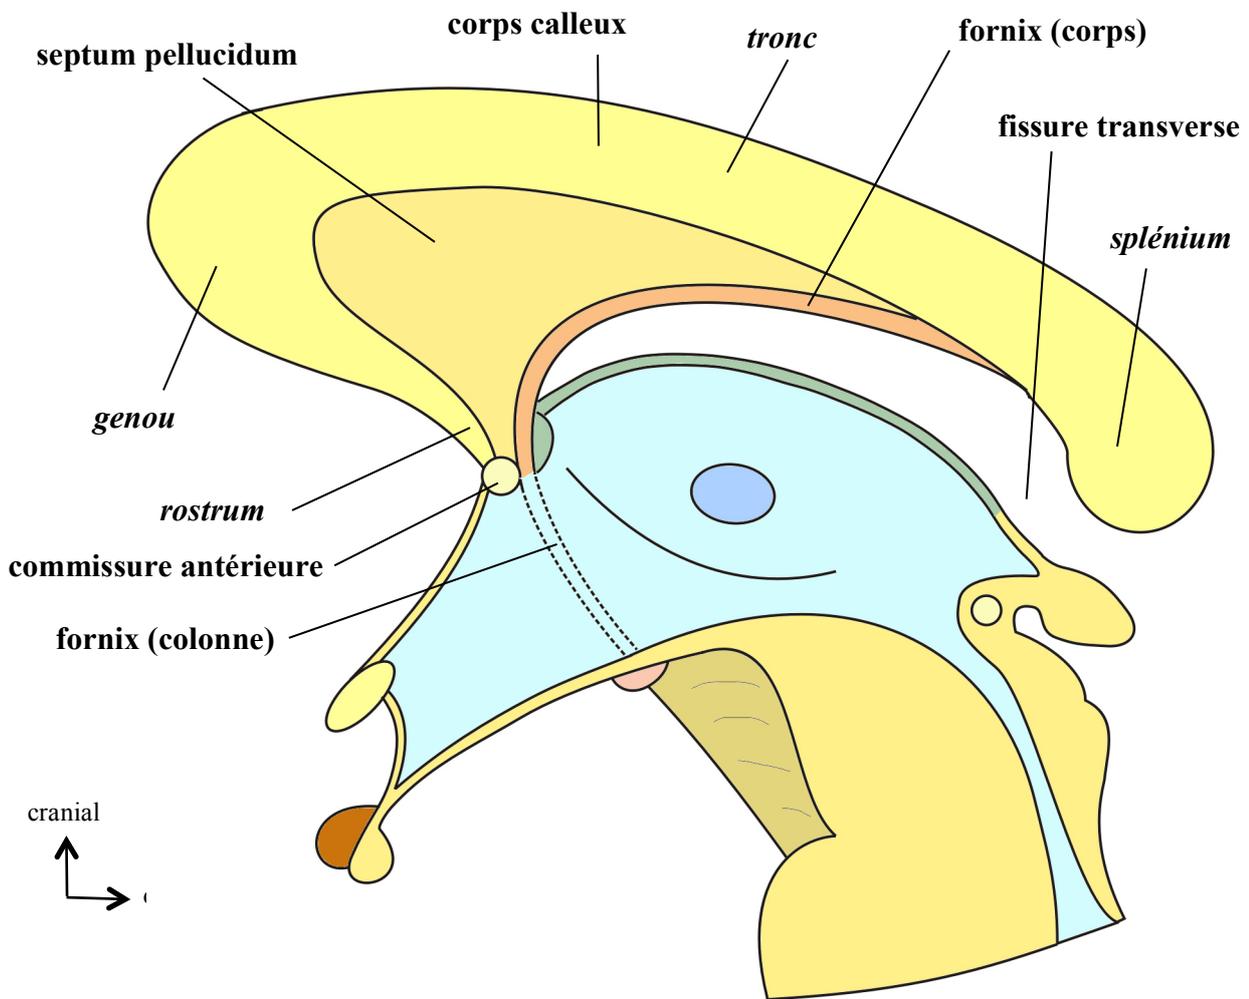

**La substance blanche des hémisphères
 (coupe horizontale)**

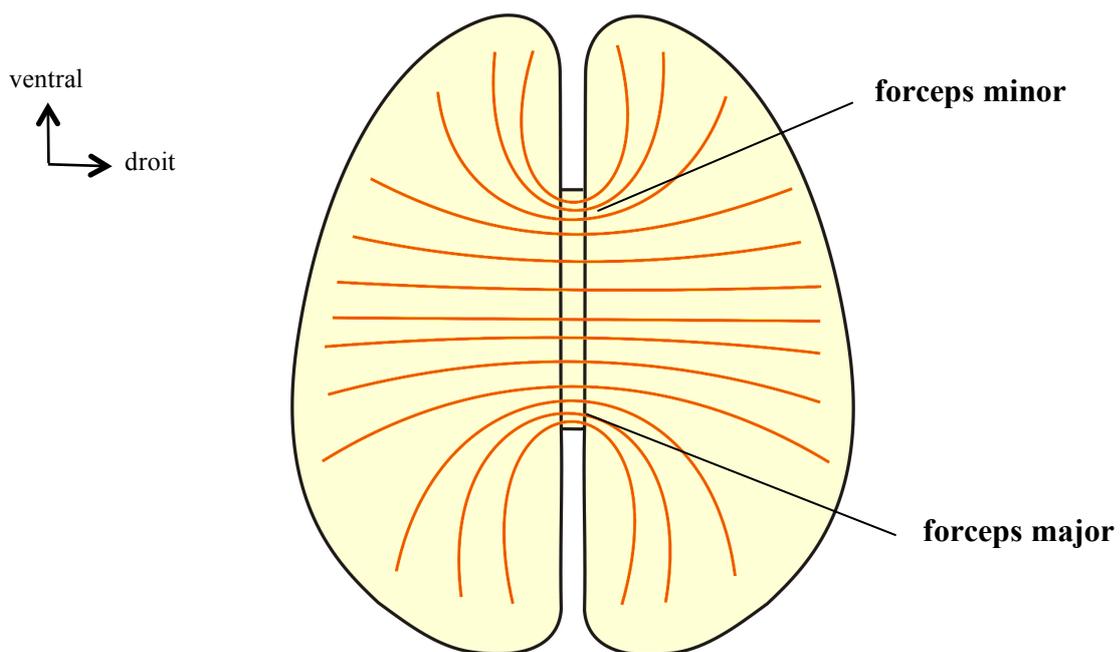

Les faisceaux d'association

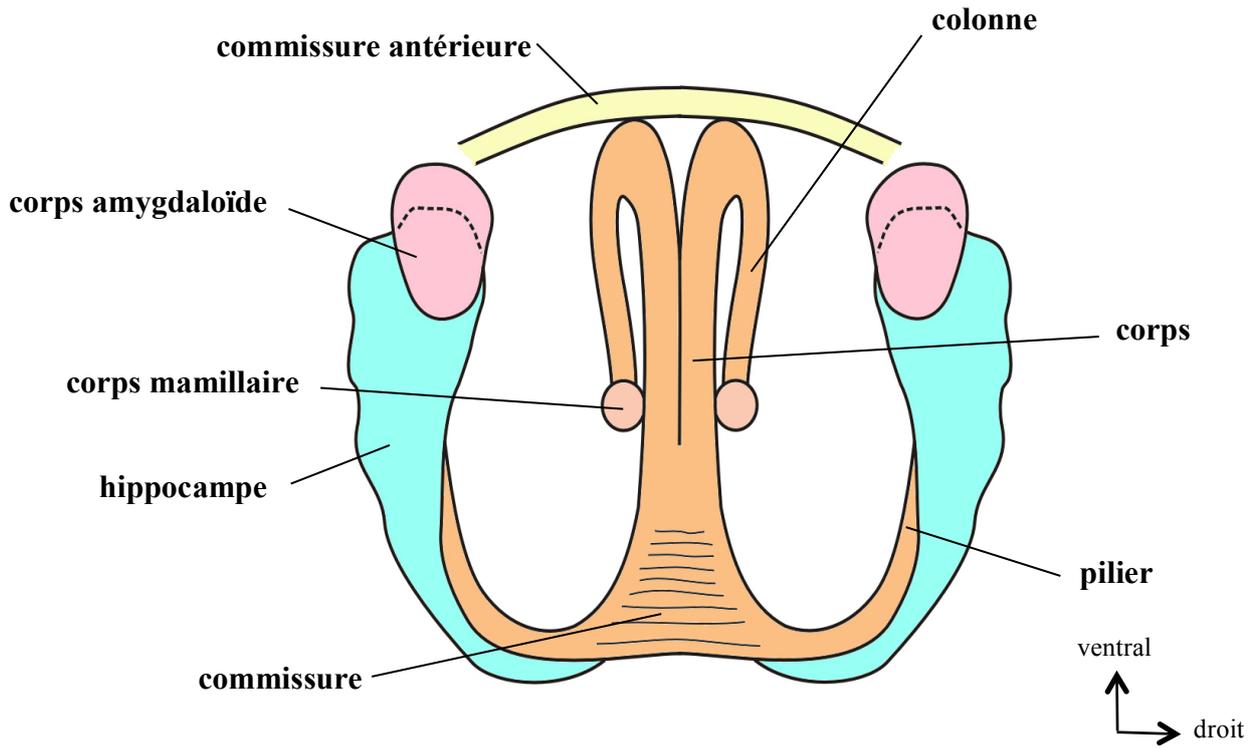

La substance blanche des hémisphères

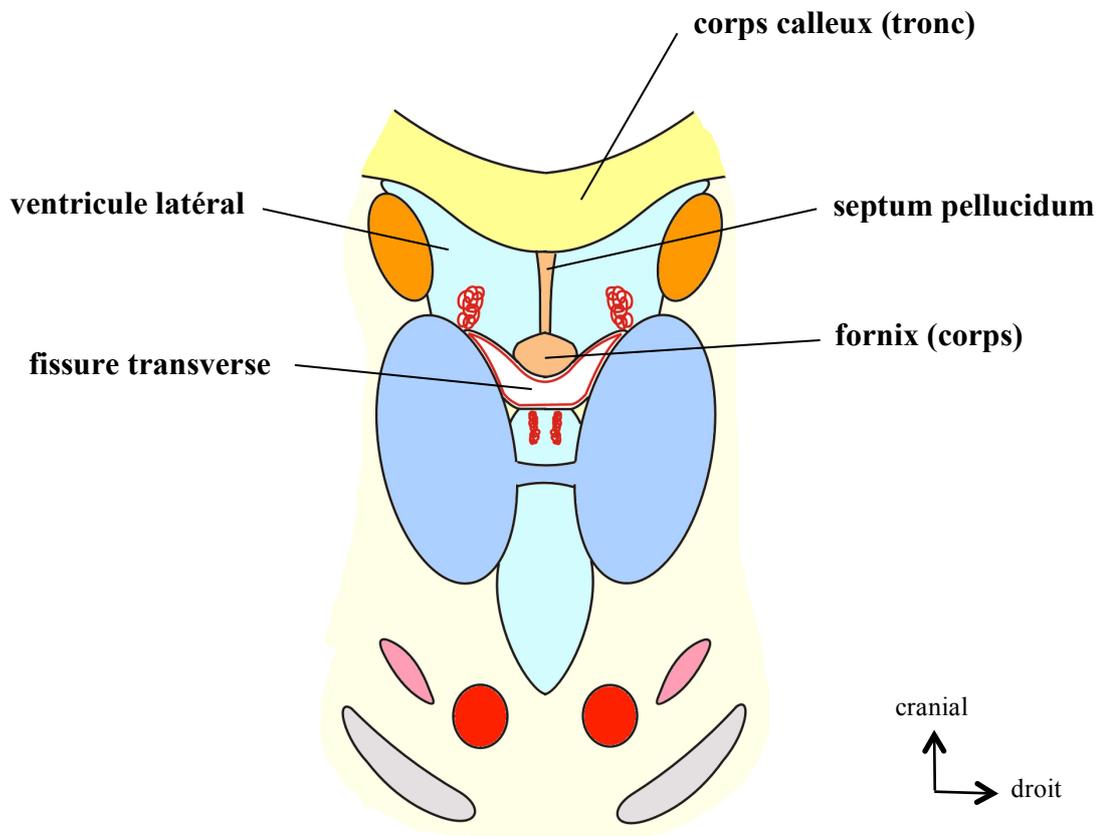

Les commissures inter-hémisphériques

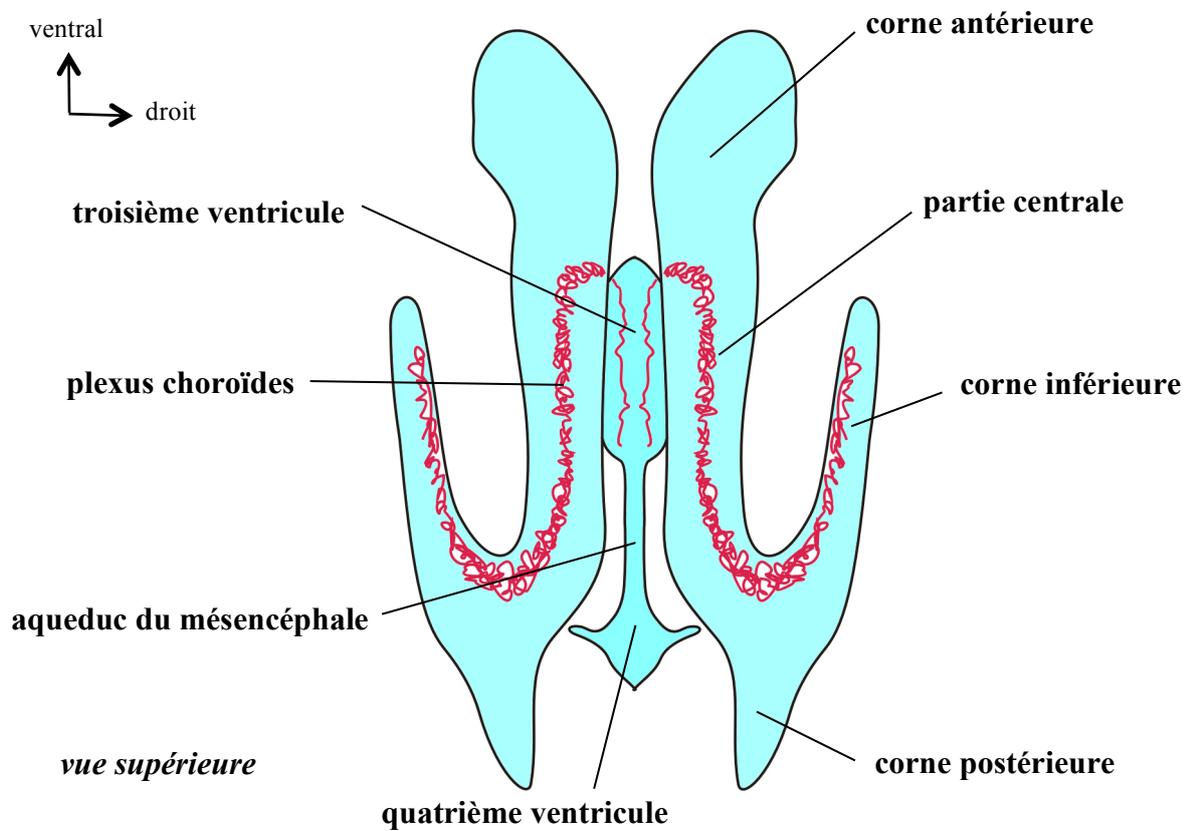

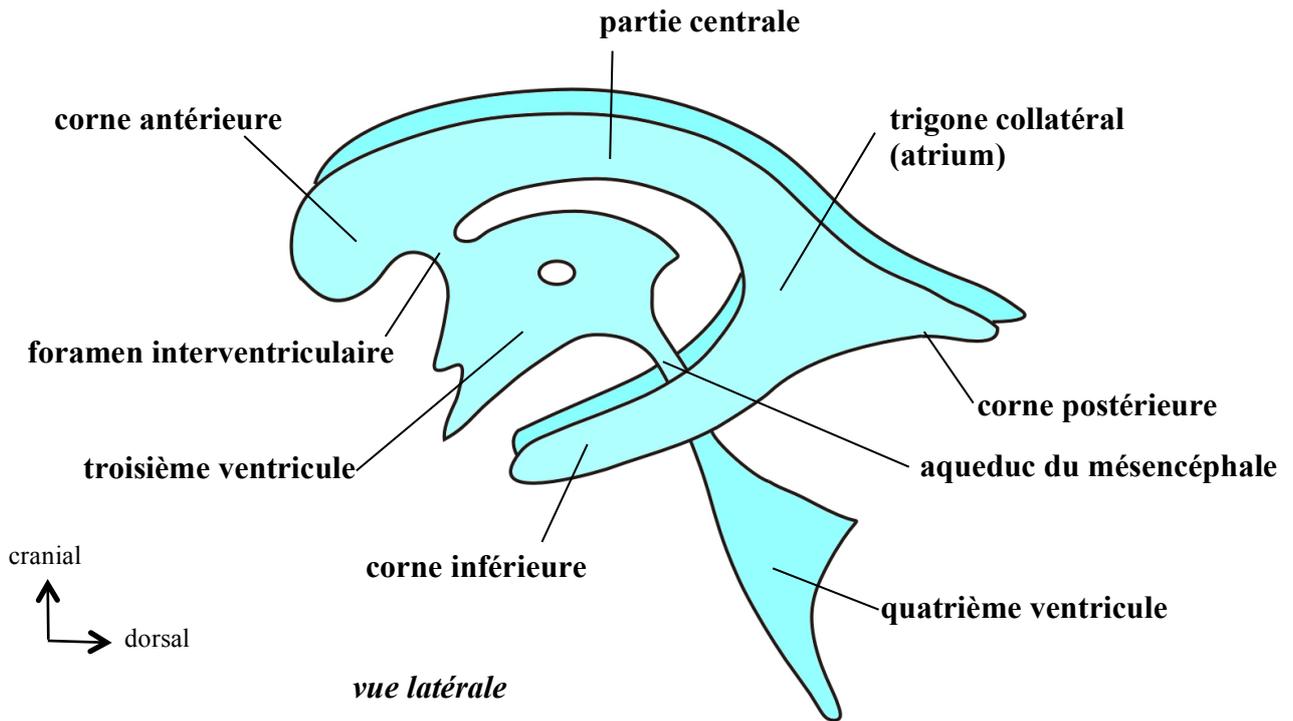

Le corps calleux

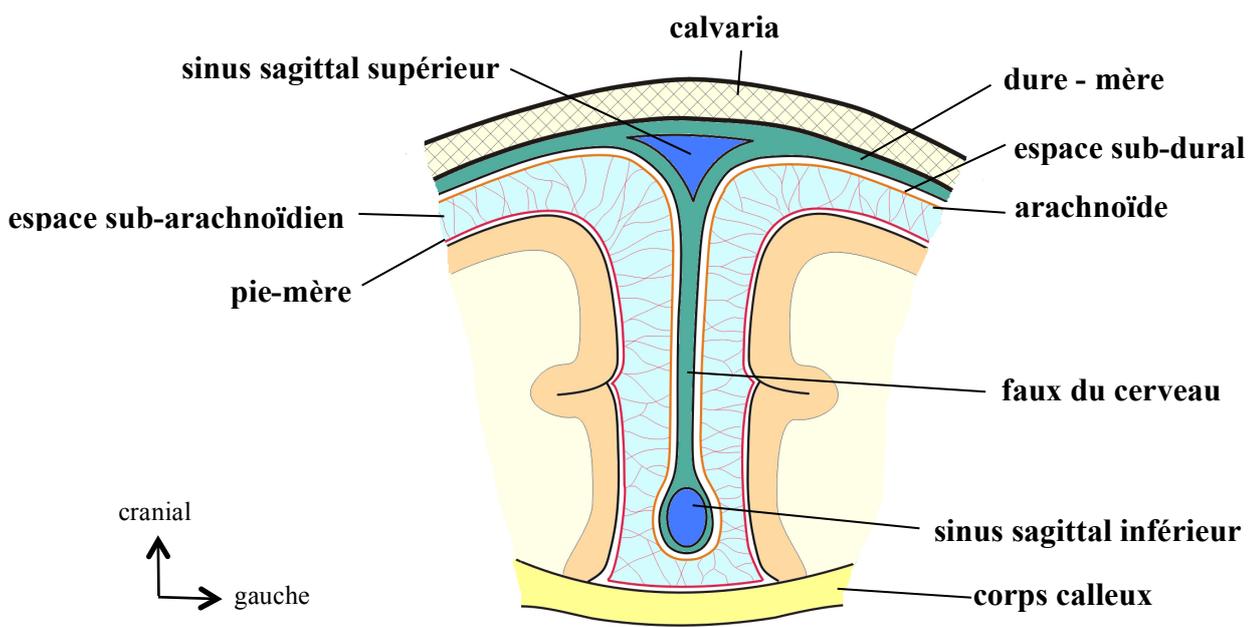

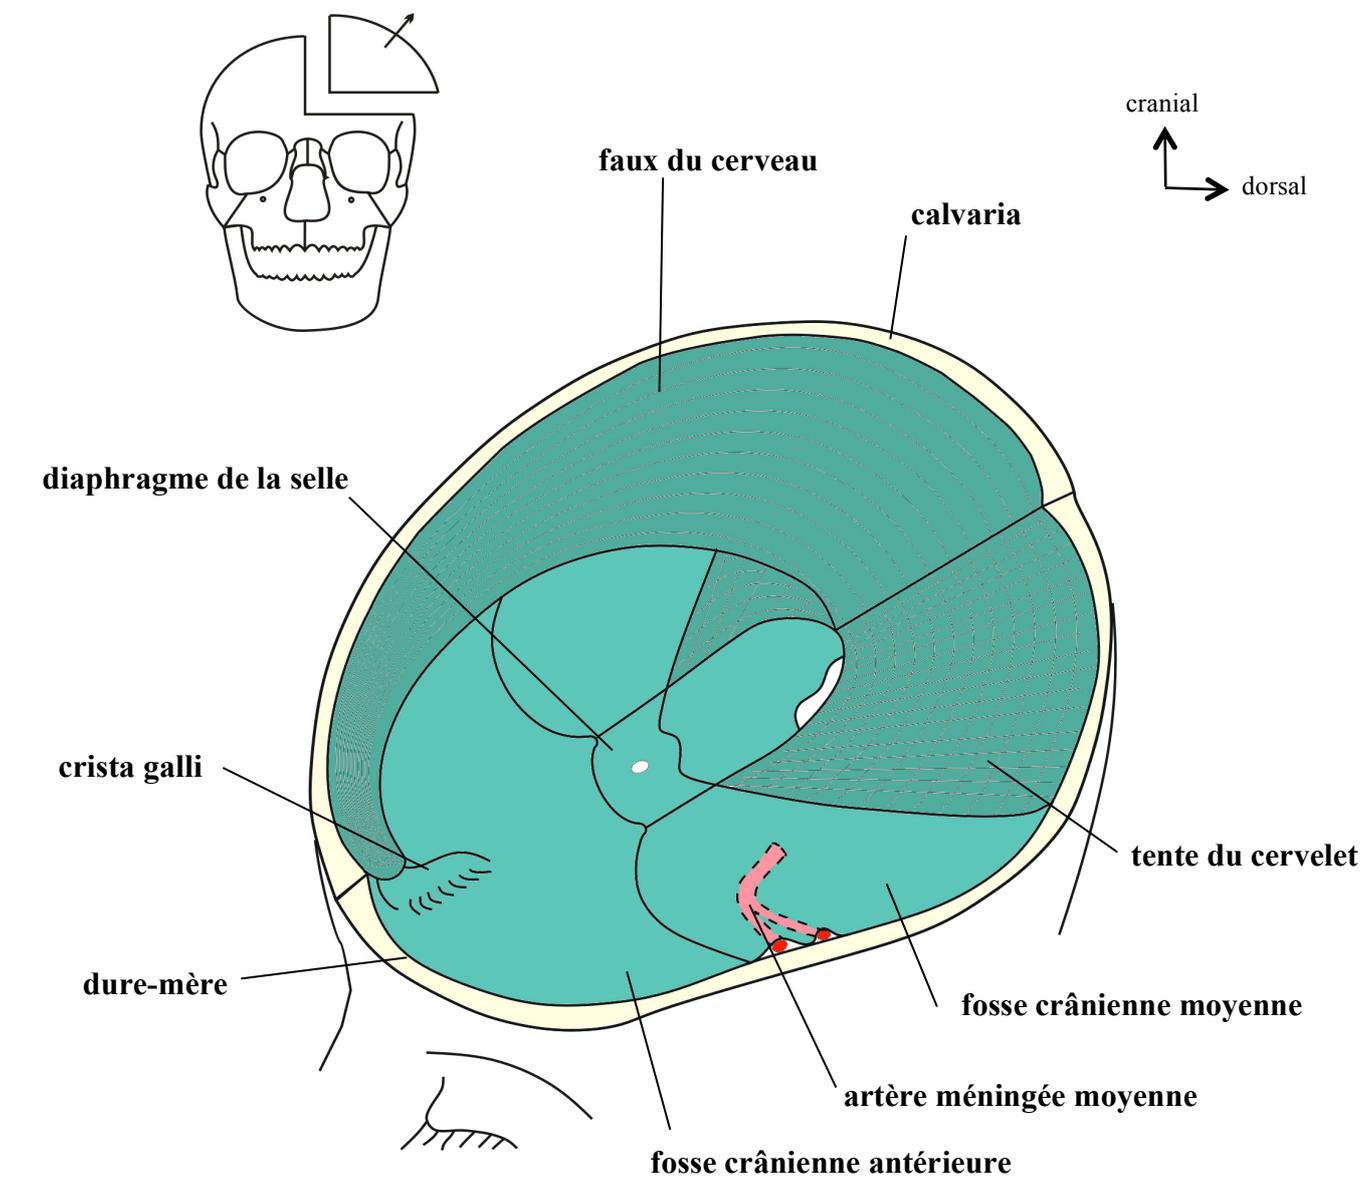

Le fornix

**Les commissures inter-hémisphériques
(coupe frontale)**

Les ventricules latéraux

Les rapports du cerveau
